

SharkRack / APC Rackmount LCD Monitor / Keyboard Drawer

At long last SharkRack and APC have solved the problem of incorporating both a retractable keyboard and a functional colour monitor in a cabinet! Rather than occupying the usual 9U to 12U (~20" / 508mm) of rackable space that other manufacturers require, the new fully integrated LCD / Keyboard drawer from SharkRack requires only 1 Rackable Unit (1.75" / 44.5mm)!!

Here is a solution that provides IT professionals with the much-needed functionality of a colour monitor, keyboard, and trackball in the least amount of physical space possible.

Multi-Platform. To insure maximum value, SharkRack has worked with APC to insure that the new LCD monitor / Keyboard Drawer supports both NT and Sun Solaris. This means greater flexibility and maximum value.
